

We keep moving so the traffic can too ...

Introducing the latest in digital print evolution

Anapurna H1650i LED Express **ORALITE**® UV Traffic Sign Printer

Optimised for digital production of traffic control and guidance signs, full colour large format images and direct to substrate printing.

Designed for use with a comprehensive range of permanent and temporary reflective and non-reflective **ORALITE**® materials, the H1650i provides an all round solution for sign makers wanting to gain an advantage in our challenging market.

The Benefits

• **Unique ink system providing 10 year life when used in conjunction with **ORALITE**® reflective materials**
