

The Green Mile

Product Bulletin – September 2020

Green EV Number Plates are coming, but have not yet gone through legislation.

What we know so far:

- Plates are for pure zero emission electric vehicles only – not hybrids
- Launch expected for Q4 2020 – subject to the Green Light from the DVLA
- Identifier will be a side badge only and can include National Flags
- Registration will remain unaffected and may still feature borders, True 3D plastic digits etc
- Plan is to fit as standard to all new zero emission cars (but customers can opt out) and can be retro-fitted to current EVs on presentation of V5C.

Tennants will be providing a range of requisite components (pre-printed media where necessary) or supply a Made Up Plate service – **whichever is most suitable for your business.**

Purchase options available. Contact our sales team on 0115 973 8084 or email sales@tennantsuk.com for more information or to arrange a demonstration
