## Reflective bollard panels

### Come on, come on, let's stick together

Choose **ORALITE®** reflective materials from Tennants for your bollard range:

**Oralite 6910 Brilliant Grade Prismatic**

**Oralite 6910T Brilliant Grade Prismatic Translucent**

#### Benefits include:

- RA3B reflective grade
- 12 year life for symbols / 10 year life for fluorescent colours
- Superior **Hi-TAK** adhesive – significantly reduces preparation time
- Pre-cut panels to suit any bollard with edge sealing option
- Full range of UV printed sign faces available
- Suitable for use on BS 8442 and BS EN 12767 compliant products
- Available with a full range of compatible overlays and protective laminates including Anti-Graffiti, Anti-Dew and Anti-Sticker

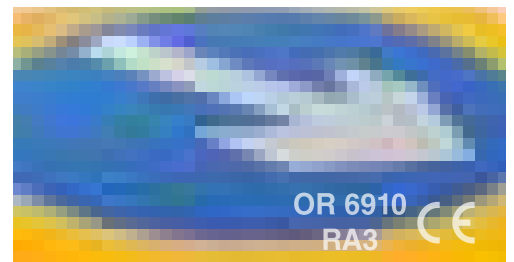

#### \* Adhesion and performance testing

Oralite 6910HT has undergone robust testing in accordance with BS 8442:2015 to confirm its effectiveness when applied to flexible bollard panels, both utilising traditional surface preparation methods and also when foregoing these processes.

Results establish that this product performs better than its main competitors, both when pre-treated and especially when no preparation has been undertaken.

Oralite micro-prismatic materials also feature greater flexibility and are therefore less brittle, improving impact resistance.
