

WE ARE SETTING A NEW STANDARD IN GEL DIGITS

THE 3D GEL DIGITS

Our 3D Gel Digits are made in high gloss black polyurethane resin. Each one is carefully hand-domed to reduce flaws and imperfections, ensuring a pristine finish that enhances the aesthetic appeal of your vehicle. The clear resin coating not only gives the digits their distinctive appearance but also adds a layer of protection. This makes them more resistant to fading, scratching, and damage from weather conditions such as rain, snow, and sunlight.

These Gel number plates mark a significant milestone as the first ever to comply with BSAU 145e standards and are UKAS Lab certified, setting a new benchmark for quality and compliance in the UK Market.

COMPLIANT

Meets and exceeds BSAU 145e.

UKAS CERTIFIED

Durable advanced weathering.

MOT FRIENDLY

Peace of mind; In comparison to other gel digits on the market.

UPSELL RRP

Excellent upsell opportunity for dealerships.
