PLATE SPEC Film on Enviro-Plate
Acrylic on Reflective

PRODUCES Oblong Plates
With/Without Lip

VOLUME Up to 40 Plates
per Month

System Overview

The Core Sheet quickly prints high-quality oblong number plates, making it perfect for your pre-sales team or workshop. A CL-S621 Printer from Citizen forms the heart of this system. Easy to use & maintain, it quickly prints mono number plates on clear film or dry reflective sheets using a ribbon.

To ensure compliance included software enforces British Standards, validates Registrations and records activity. Those records can be synced with our online portal and the data used for managerial oversight. To assist with plate assembly, a Roller Jig is included with each system.

Specifications

Environmental Conditions

Each printer we provide is modified with firmware settings that require some basic conditions be met. For the best printing results, only operate them in suitable locations.

Our settings are based on information from manufacturers and the results from our own internal testing.

Temperature:
15 to 32°C

Humidity:
20 to 80% rh

Low Dust:
Particles ruin prints

Aerosols:
Fumes can effect prints

System Services

Branded Components
Utilise pre-printed bottom lines, logos or take advantage of restriction free advertising lips.

Recycling Service
If eligible, we will provide an on-site bin and recycle your waste number plates when its full.
